CONTENTS OF VOLUME 21

Vol. 21, No. 1

Minireview

Dan Wells and **John Herrmann** 1 Functionally constrained codon usage in histone genes

General Papers

Irit Schön (Shahin), Yossi Sofer, Miriam Cojacaru and **Shlomo Grossman** 7 Arachidonic acid metabolism by perfused ram testis

Pei-Ming Li, Jin-Laing Zhong, Rui-Qun Chen, Xiao-Kun Zhang, Kei-Ling Ho, Jen-Fu Chiu and **Dao-Pei Huang** 15 Zhi-mu saponin inhibits α-fetoprotein gene expression in developing rat liver

Gary Williamson 23 Multiple forms of glutathione S-transferase from pig liver—reaction with methyl linoleate hydroperoxides

Michael P. Ryan and **Paul J. Higgins** 31 Sodium-*n*-butyrate induces secretion and substrate accumulation of p52 in Kirsten sarcoma virus-transformed rat kidney fibroblasts

L. J. Mostert, M. I. Cleton, W. C. de Bruijn, J. F. Koster and **H. G. van Eijk** 39 Studies on ferritin in rat liver and spleen during repeated phlebotomy

D. W. Lee and **K. H. Park** 49 Testosterone metabolism by microsomal cytochrome *P*-450 in liver of rats treated with some inducers

Jiann-Wu Wei and **Shiu-Shiung Lin** 59 Studies of blocking mechanisms of carbachol-induced polyphosphoinositide turnover in rat cortical synaptosomes by neuroactive drugs

I. W. Taylor, C. Ioannides and **D. V. Parke** 67 Organic nitrate reductase: reassessment of its subcellular localization and tissue distribution and its relationship to the glutathione transferases

J. J. Smith, A. V. Capuco, W. E. Beal and **R. M. Akers** 73 Association of prolactin and insulin receptors with mammogenesis and lobulo-alveolar formation in pregnant ewes

Nobuhiro Mori and **Hisayoshi Sugihara** 83 Characterization of kallikrein-like enzyme from *Crotalus ruber ruber* (red rattlesnake) venom

Nanette van der Westhuizen, Ryno J. Naudé and **Willem Oelofsen** 91 The isolation and partial characterization of chymotrypsinogen from the pancreas of the ostrich (*Struthio camelus*)

Bernard R. Landau 99 Why the L-type pentose pathway does not function in liver

H. Mohammed Valivullah and **T. W. Keenan** 103 Butyrophilin of milk lipid globule membrane contains *N*-linked carbohydrates and cross-links with xanthine oxidase

Richard B. Mertens, Howard P. Sherr, Steven E. Mayer, Henry O. Wheeler and **Laurence L. Brunton** 109 Characterization of hormone-sensitive adenylate cyclase in rabbit gallbladder mucosa

Book Reviews 117

Vol. 21, No. 2

Minireviews

Ian F. Pryme — 119 — The nuclear-associated endoplasmic reticulum

David J. Telford and Bernard W. Stewart — 127 — Micrococcal nuclease: its specificity and use for chromatin analysis

General Papers

Hiroshi Nakao, Yoriyuki Kurita, Ryoji Tsuboi, Kenji Takamori and Hideoki Ogawa — 139 — Differences in induction of lysosomal protease activity by protease inhibitors in B16 melanoma cell lines

Pierre Frémont, Sophie Boudriau, Roland R. Tremblay, Claude Côté and Peter A. Rogers — 143 — Acetazolamide-sensitive and resistant carbonic anhydrase activity in rat and rabbit skeletal muscles of different fiber type composition

T. B. Ng, W. W. Li and H. W. Yeung — 149 — Effects of lectins with various carbohydrate binding specificities on lipid metabolism in isolated rat and hamster adipocytes

Gunnar Tiger, Per-Erik Björklund and Christopher J. Fowler — 157 — Stimulation of inositol phospholipid breakdown in pig brain miniprisms by carbachol and monoamines: effect of K^+

B. L. Slomiany, V. L. N. Murty, J. Sarosiek and A. Slomiany — 165 — Enzymatic sulfation of mucus glycoprotein in rat submandibular salivary gland

Françoise Gasnier, Pierre Louisot and Odile Gateau — 173 — Galactosyltransferase activities in mitochondria outer membrane: biosynthesis of galactosylated proteins

Janusz Z. Byczkowski and Arun P. Kulkarni — 183 — NADPH-dependent drug redox cycling and lipid peroxidation in microsomes from human term placenta

T. Gauthier, C. Denis-Pouxviel and J. C. Murat — 191 — Carbohydrate metabolism in HT29 colon cancer cells cultured in a glucose free medium supplemented with inosine

K. D. Hammond, L. Cloutman, B. Mindel and D. A. Gilbert — 197 — Temporal changes in phosphoamino acid phosphatase activities in murine erythroleukaemic cells

V. L. Sylvia, J. O. Norman, G. M. Curtin, J. Stec and D. L. Busbee — 203 — Purification of Norman Murine Sarcoma DNA polymerase alpha forms with different DNA template primer binding affinity and different specific activity

Salman Azhar, John Butte and Eve Reaven — 209 — Calcium-activated phospholipid-dependent protein kinases from rat liver: characterization of purified isoenzymic forms

M. C. Rios de Molina, M. C. Taira and L. C. San Martin de Viale — 219 — Liver ferrochelatase from normal and hexachlorobenzene porphyric rats. Studies on their properties

Dennis Beale and John Coadwell — 227 — Some observations on conserved polar side chains in immunoglobulin V-domains

Book Reviews — 233

New Patents Section — i

Vol. 21, No. 3

Minireviews

M. F. Counis, E. Chaudun, B. Allinquant, A. S. Muel, M. Sanval, C. Skidmore and Y. Courtois — 235 — The lens: a model for chromatin degradation studies in terminally differentiating cells

Daniel W. Nebert and John E. Jones — 243 — Regulation of the mammalian cytochrome P_1-450 (CYP1A1) gene

G. de Jong and H. G. van Eijk — 253 — Functional properties of the carbohydrate moiety of human transferrin

General Papers

Christiane Levrat, Dominique Ardail, Renée Morelis and Pierre Louisot — 265 — Study of the N-glycoprotein biosynthesis through dolichol intermediates in the mitochondrial membranes

Seiichiro Sekoguchi, Toshiaki Nikai, Minobu Itoh and Hisayoshi Sugihara — 279 — Two toxins from the venom of *Trimeresurus tokarensis*

Paolo Degan, Patrizia Carpano, Giovanni Cercignani and Giorgio Montagnoli — 291 — A fluorescence study of substrate and inhibitor binding to bovine liver dihydrofolate reductase

Rhonda E. Mapes and Malcolm Watford — 297 — Effects of metabolic acidosis and diabetes on the abundance of specific renal mRNAs

Tapio Vartio, Harriet von Koskull and Ismo Virtanen — 307 — ED-A sequence containing fibronectin in human amniotic fluid and amnion epithelial cells

Tapani Hyvönen — 313 — Excretion of acetylated and free polyamines by polyamine depleted Chinese hamster ovary cells

Kazumasa Ikeda, Haruo Suzuki, Tadao Okano and Shigeki Nakagawa — 317 — Human spleen cathepsin D: its characterization and localization in human spleen

F. M. Ruggiero, G. V. Gnoni and E. Quagliariello — 327 — Lipid composition of brown adipose tissue mitochondria and microsomes in hyperthyroid rats

Wolfgang Riediger, Hans-Gilbert Hergenhahn and Dietrich Sedlmeier — 333 — Calmodulin-stimulated particulate guanylate cyclase in crayfish hepatopancreas

Vanio I. Mitev and Ljuben M. Sirakov — 337 — The difference between cytosol and membrane growth-related protein kinase activities in lactating mouse mammary gland

Book Reviews — 341

New Patents Section — i

Vol. 21, No. 4

Minireview

Hans-Jacob Haga — 343 — Kidney lysosomes

General Papers

V. L. Sylvia, C. O. Joe, J. O. Norman, G. M. Curtin, R. D. Tilley and D. L. Busbee — 347 — Interaction of phosphatidylinositol-4-monophosphate with a low activity form of DNA polymerase alpha: a potential mechanism for enzyme activation

Norbet Berndt and Peter Rösen — 355 — Activation and inactivation of glycogen phosphorylase isoenzymes purified from diabetic rat heart

J. Bereta, A. Kurdowska, A. Koj, T. Hirano, T. Kishimoto, J. Content, W. Fiers, J. Van Damme and J. Gauldie — 361 — Different preparations of natural and recombinant human interleukin-6 (IFN-β_2, BSF-2) similarly stimulate acute phase protein synthesis and uptake of α-aminoisobutyric acid by cultured rat hepatocytes

Hideo Sawada, Akira Hara, Makoto Nakagawa, Fumitake Tsukada, Mari Ohmura and Kazuya Matsuura — 367 — Separation and properties of multiple forms of dihydrodiol dehydrogenase from hamster liver

Rosa Wainstok de Calmanovici, Silvia C. Billi de Catabbi, Carmen A. Aldonatti and **Leonor C. San Martín de Viale** 377 Influence of the strain of rats on the induction of hexachlorobenzene induced porphyria

Sean Waters and **Alexandra von der Decken** 383 Characterization of liver chromatin proteins after induction of vitellogenin synthesis in salmon (*Salmo salar*)

Guang Gao, De-Xu Zhu, Xu Tao, Jie Zheng, Andrée Scharfman, Geneviève Lamblin, Yuen W. Shing and **Kia-Ki Han** 391 The specific binding activities of human urinary radioiodinated colony-stimulating factor-1 to various human tissue cells

S. H. Khodaparast-Sharifi and **L. Dale Snow** 401 Levamisole inhibition of alkaline phosphatase and 5′-nucleotidase of bovine milk fat globule membranes

Roger A. Peeters, Monique A. P. M. in 't Groen, Marielle P. de Moel, Herman T. B. van Moerkerk and **Jacques H. Veerkamp** 407 The binding affinity of fatty acid-binding proteins from human, pig and rat liver for different fluorescent fatty acids and other ligands

Mark Parry-Billings, Brendan Leighton, George Dimitriadis, Paulo R. L. de Vasconcelos and **Eric A. Newsholme** 419 Skeletal muscle glutamine metabolism during sepsis in the rat

N. Seiler, G. Daune, F. N. Bolkenius and **B. Knödgen** 425 Ornithine aminotransferase activity, tissue ornithine concentrations and polyamine metabolism

Shigeki Shichijo, Rika Tsunosue, Masato Shiraishi, Mitsunori Iwamoto, Hideki Shibata and **Mitchel Mitsuo Yokoyama** 433 Further studies on a chemoattractant derived from *Aleurites Fordii Hemsl.* seed

B. J. Lorber and **I. Z. Ades** 439 Regulation of biogenesis of liver δ-aminolevulinate synthase: effects of structural modifications of heme on the enzyme's RNA

Jane Cyran, Michael A. Lea and **Thomas W. Lysz** 445 Prostaglandin biosynthetic capacity of hepatomas with different growth rates

Book Reviews 453

New Patents Section i

Vol. 21, No. 5

Minireview

Adam Csordas 455 A proposal for a possible role of nucleosome positioning in the evolutionary adjustment of introns

General Papers

Koji Kobayashi, Kazufuni Kuroda, Tomoyuki Shinomiya, Chikao Nishino, Junichi Ohya and **Shigeru Sato** 463 Effect of pisiferic acid and its derivatives on cytotoxicity macromolecular synthesis and DNA polymerase α of HeLa cells

Miguel A. Chinchetru, Jose A. Cabezas and **Pedro Calvo** 469 Purification and characterization of a broad specificity β-glucosidase from sheep liver

Jeanne W. George, Kathryn Nulk, Andrew Weiss, Michael L. Bruss and **Charles E. Cornelius** 477 Biliverdin reductase activity in cattle, sheep, rabbits and rats

Hisanori Kato, Shin-Ichiro Takahashi, Akio Takenaka, Ryuhei Funabiki, Tadashi Noguchi and **Hiroshi Naito** 483 Degradation of endogenous proteins and internalized asialofetuin in primary cultured hepatocytes of rats

Akio Takenaka, Tomohiro Tayama, Shin-Ichiro Takahashi, Hisanori Kato, Tadashi Noguchi and **Hiroshi Naito** 497 Microinjection of endogenous and exogenous proteins into primary cultures of rat hepatocytes and the degradation of the injected proteins

S. Levanat and **K. Pavelić** 509 Isolation and purification of a substance immunologically cross-reactive with insulin (SICRI) from tumor tissue

Ray Manning, Sarah Courtney and **Steven Talbot** 517 Temporal changes in plasma and liver lipids and in the hepatic activities of acetyl-coenzyme A carboxylase and fatty acid synthetase after oestrogen treatment of the male chicken (*Gallus domesticus*)

Janusz Z. Byczkowski and **Teresa Gessner** 525 Effects of inhibition of NADPH:cytochrome *P*-450 reductase on benzo(a)pyrene metabolism in mouse liver microsomes

M. A. Spearman, S. Wayne, J. C. Jamieson, J. A. Wright and **E. Gospodarek** 531 Studies on glycosyltransferases in fusion-defective conA-resistant L6 rat myoblast cell lines

Patrick A. Sinnett-Smith and **John A. Woolliams** 535 Antilipogenic but not lipolytic effects of recombinant DNA-derived bovine somatotropin treatment on ovine adipose tissue; variation with genetic type

D. Ardail, F. Lerme, O. Gateau-Roesch, P. Louisot and **R. Morelis** 541 Glucosyltransferase activity in mitochondria. Biosynthesis of glucosyl-phosphoryl-dolichol in inner mitochondrial membranes

D. Beale 549 Tryptic digestion of bovine secretory IgA at elevated temperature and in urea. Isolation of SC domain 1 which is covalently bound to IgA dimer and binds non-covalently to IgM

Rolf A. Løvstad 555 Stimulatory effect of phosphate, ATP and ADP on iron transfer from Fe(III)–bleomycin to apotransferrin

Philip C. Calder and **Robert Geddes** 561 Rat skeletal muscle lysosomes contain glycogen

Philip C. Calder and **Robert Geddes** 569 Regulation of lysosomal glycogen metabolism: studies of the actions of mammalian acid α-glucosidases

Book Reviews 577

New Patents Section i

Vol. 21, No. 6

Minireview

C. Izquierdo and **F. J. Burguillo** 579 Synthetic substrates for thrombin

General Papers

Marianne Andersson and **Lillemor Lewan** 593 Intracellular compartmentation of diadenosine tetraphosphate (Ap_4A) and dTTP in rat liver

Mauro Degli Esposti, Nicodemo Mele and **Giorgio Lenaz** 599 Structural analogies between different redox enzymes inserted into biological membranes

Paul J. Higgins 609 Altered expression and distribution of the cytoskeletal-associated p35 protein in NIH 3T3 cells transformed with the Harvey sarcoma virus v-*ras* oncogene

Paul J. Higgins, Martin Lipkin, Connie Bueti and **Frank Traganos** 619 Decreased content of the 35 kDa cytoskeletal protein p35 in Friend erythroleukemia cells exposed to dimethyl sulfoxide and retinoic acid is associated with entrance into a quiescent substrate

Paolo Mondola, Mariarosaria Santillo, Idolo Tedesco, Franco Santangelo, Anna Belfiore and **Maurizio Bifulco** 627 Thymus fraction (FIII) effect on cholesterol metabolism: modulation of the low density lipoprotein receptor pathway

Ilona Farkas and **Pál Gergely** 631 Activation/dephosphorylation of muscle glycogen synthase phosphorylated by phosphorylase kinase

Adel L. Barsoum and **Veer P. Bhavanandan** 635 Detection of glycophorin A-like glycoproteins on the surface of cultured human cells*

Darryl Bernard Spivey and **L. Dale Snow** 645 Adenosine deaminase activity of chicken erythrocyte and heart cytosols

M. P. G. de Crom, M. J. van Haperen, P. Puchois, J.-C. Fruchart, T. van Gent, A. van Tol and **A. W. M. van der Kamp** 649 Binding characteristics of high density lipoprotein subclasses to porcine liver, adrenal and skeletal muscle plasma membranes

Prem P. Batra, Kazuo Yamamoto and **Kunio Takeda** 657 Adenylate kinase of *Mycobacterium marinum*. Amino acid composition, secondary structure and other aspects

Ilse Beckmann, H. G. van Eijk, Felicja Meisel-Mikołajczyk and **H. C. S. Wallenburg** 661 Detection of 2-keto-3-deoxyoctonate in endotoxins isolated from six reference strains of the *Bacteroides fragilis* group

Kuniko Imai, Toshiaki Nikai, Hisayoshi Sugihara and **Charlotte L. Ownby** 667 Hemorrhagic toxin from the venom of *Agkistrodon bilineatus* (Common cantil)

R. J. Harvima, I. T. Harvima, E. O. Kajander, I. M. Penttilä, H. Neittaanmäki and **J. E. Fräki** 675 Effect of handling of plasma samples on histamine radioenzyme assay

I. Z. Ades 679 Characterization of chicken liver L-alanine:4,5-dioxovaleric acid aminotransferase

Juan Peragón, Fermin Aranda, Leticia García-Salguero and **José A. Lupiáñez** 689 Influence of experimental diabetes on the kinetic behaviour of renal cortex hexose monophosphate dehydrogenases

André van Tonder, Ryno J. Naudé and **Willem Oelofsen** 695 Ostrich fructose 1,6-bisphosphatase: distribution of activity and purification of the liver isoenzyme

Kalina I. Vaptzarova, Eugenia N. Baramova and **Panteley G. Popov** 701 Endotoxin inhibition of glucocorticoid enzyme induction and *in vivo* ^{3}H-dexamethasone labelling of rat liver nuclei

New Patents Section i

Vol. 21, No. 7

Minireview

Marianne Andersson 707 Diadenosine tetraphosphate (Ap_4A): its presence and functions in biological systems

General Papers

K. Graham, J. E. Fleming, R. Young and **K. G. Bensch** 715 Preparation of antibodies against xanthine oxidase from human milk

Javier Díaz-Nido and **Jesús Avila** 723 Quantitation of microtubule-associated protein MAP-1B in brain and other tissues

M. Reza Ziai and **Soldano Ferrone** 731 Specific phosphorylation by calcium–EGTA complex of a 75 kDa human tumor plasma membrane protein (pp75)

Hiroshi Nakao, Kenji Takamori and **Hideoki Ogawa** 739 Interaction of tumor and surrounding tissue of mice inoculated B16 melanoma variants in terms of enzyme activity

Kiyoshi Nagashima 745 Inhibitory effect of eugenol on Cu^{2+}-catalyzed lipid peroxidation in human erythrocyte membranes

Masaru Sato, Hironori Tsuchiya, Motohiro Kato, Kohji Yamamoto, Gohichiroh Nakazato, Nobuhiko Takagi and **Isamu Namikawa** 751 Effects of Tween 80 and sodium fluoride on extracellular glucosyltransferase production and membrane lipids of *Streptococcus mutans*

Nils Peder Willassen and **Clive Little** 755 Effect of 2,3-butanedione on human myeloperoxidase

Dominique Margelin, Anne-Marie Pigier, Jean Gardette, Jany Bertrand, Ngoc Vu-Dac and **Jacques Picard** 761 Evidence for an interaction of lipoprotein lipase with artery wall proteoglycans

T. Beccari, F. Pezzetti, R. Belardinelli, M. Bodo, E. Becchetti and **A. Orlacchio** 769 *β-N*-Acetylhexosaminidase isoenzymes during chick embryo development

M. Wakita and **S. Hoshino** 777 Enzymatic properties of pyruvate kinase from the rumen ciliates genus *Entodinium*

José M. Bautista, Germán Soler and **Amando Garrido** 783 The regulation of glucose 6-phosphate dehydrogenase from *Dicentrarchus labrax* (bass) liver

Luis Pezzi, Dennis L. Merat, Martin A. Winkler and **Wai Yiu Cheung** 791 Calmodulin-dependent phosphatase preferentially dephosphorylates a 28 kDa protein in human platelets

E. Olszowska, S. Olszowski, J. M. Zgliczyński and **T. Stelmaszyńska** 799 Enhancement of proteinase-mediated degradation of proteins modified by chlorination

Mark R. Deziel, Howard A. Lippes, Amrit L. Rampal and **Chan Y. Jung** 807 Phosphorylation of the human erythrocyte glucose transporter by protein kinase C: localization of the site of *in vivo* and *in vitro* phosphorylation

Michael J. Allen and **Peter Johnson** 815 Desmin-containing intermediate filaments: structural analysis using monoclonal antibodies

New Patents Section i

Vol. 21, No. 8

Vladimir Leskovac, Jasmina Svirčević, Svetlana Trivić, Mirjana Popović and **Mirjana Radulović** 825 Reduction of aryl–nitroso compounds by pyridine and flavin coenzymes

Satoshi Sumida, Kiyoji Tanaka, Hiroyo Kitao and **Fumio Nakadomo** 835 Exercise-induced lipid peroxidation and leakage of enzymes before and after vitamin E supplementation

J. K. Kiaira and **R. M. Njogu** 839 Evidence for glycerol 3-phosphate: glucose transphosphorylase activity in bloodstream *Trypanosoma brucei brucei*

BC 21/12—I

Howard H. T. Hsu and **H. Clarke Anderson**	847	The isolation and partial sequencing of human bone alkaline phosphatase gene
Kjell Grankvist	853	Gossypol-induced free radical toxicity to isolated islet cells
Prem P. Batra, Katsushi Sasa, Takuya Ueki and **Kunio Takeda**	857	Circular dichroic study of the conformational stability of sulfhydryl-blocked bovine serum albumin
Angela Maria Vidigal Silveira, Arinos Magalhães, Carlos Ribeiro Diniz and **Eduardo Brandt de Oliveira**	863	Purification and properties of the thrombin-like enzyme from the venom of *Lachesis muta muta*
Zofia Kilianska, Wanda M. Krajewska, Marek Gaczynski, Malgorzata Marszalek and **Leokadia Klyszejko-Stefanowicz**	873	Growth-related changes of non-histone chromatin proteins from Kirkman–Robbins hepatoma
Josefa González-Nicolás, Joaquín Jiménez, Angustias Page-Pañuelas, Marta T. Zabala and **Francisco J. Moreno**	883	Regulation of lipid metabolism by dipyridamole and adenosine antagonists in rat adipocytes
Francoise Dezeure, Fritz Gerhart and **Nikolaus Seiler**	889	Activation of rat liver *S*-adenosylmethionine decarboxylase by putrescine and 2-substituted 1,4-butanediamines
Simon J. Carrington, David Fetherbe and **Kenneth T. Douglas**	901	Chemical modification of tyrosine residues in glyoxalase I from yeast and human erythrocytes
S. T. Lim, P. Y. Woon, Mabel H. J. Tan and **K. K. Ong**	909	Identification and characterization of a third form (D3) of cyclic 3′5′-nucleotide phosphodiesterase from *Rhizobium fredii*
Khay S. Cheah, Anne M. Cheah, Jeffrey E. Fletcher and **Henry Rosenberg**	913	Skeletal muscle mitochondrial respiration of malignant hyperthermia-susceptible patients. Ca^{2+}-induced uncoupling and free fatty acids
Matthias U. H. Drüsedau, Robert Yates, Nicol P. Kurstjens and **Richard C. Cantrill**	921	Uptake and stimulation-evoked release of tritiated neurotransmitters from slices of the rat rostral ventral medulla containing the nucleus raphe magnus: implications for pathways controlling nociception
Soledad Gaitán, Manuel Ruiz-Amil and **Concepcion Tejero**	925	Influence of MgATP on phosphofructokinase during trout (*Salmo gairdneri* R.) haemopoiesis: modulation by pH and temperature
K. Pavelić, Z. Kos and **Š. Spaventi**	931	Antimetabolic activity of L-ascorbic acid in human and animal tumors
Anelisa Ferreira de Almeida, Rui Curi, Philip Newsholme and **Eric A. Newsholme**	937	Maximal activities of key enzymes of glutaminolysis, glycolysis, Krebs cycle and pentose–phosphate pathway of several tissues in mature and aged rats
Pavel S. Gromov, Sergey F. Zakharov, Sergey S. Shishkin, Maria Gaczyńska, Grzegorz Bartosz and **Ewa Grzelińska**	941	Endogenous proteolysis of the human erythrocyte membrane as studied by two-dimensional gel electrophoresis and electron spin resonance
Book Reviews	947	
New Patents Section	i	

Shrinivas B. Rao and **Harihara M. Mehendale**	949	Protection from chlordecone (Kepone®)-potentiated CCl_4 hepatotoxicity in rats by fructose 1,6-diphosphate
R. Béliveau, M. Demeule and **J. Strévey**	955	Transport studies with brush border membrane vesicles: choice of experimental parameters
Barbara A. Sorg, Nancy S. Magnuson and **Raymond Reeves**	961	Effect of dexamethasone on the expression of interleukin-2 in a mouse T cell line
Martha Kaloyianni and **R. A. Freedland**	971	A new approach of the estimation of K_m of carbamyl phosphate synthetase for ammonia in isolated rat hepatocytes
E. Jane Cookson and **Robert J. Beynon**	975	Further evaluation of cofactor as a turnover label for glycogen phosphorylase
Ivan Ivanov, Nedjalka Markova, Dimcho Bachvarov, Krassimir Alexciev, Adriana Saraffova, Vera Maximova, Irina Tsaneva and **George Markov**	983	Constitutive expression of a native human interferon-alpha 1 gene in *Escherichia coli*
Krassimir Alexciev, Anna Uscheva, Maja Pavlova, Libert Yavachev and **Ivan Ivanov**	987	Expression of synthetic calcitonin genes in plasmid vectors containing tandemly repeated non-overlapping ribosome binding sites
Tapani Vanha-Perttula and **Juha Kasurinen**	997	Purification and characterization of phosphatidylinositol-specific phospholipase C from bovine spermatozoa
Paolo Mondola, Mariarosaria Santillo, Franco Santangelo, Carlo Caporale, Anna Belfiore and **Maurizio Bifulco**	1009	Purification and characterization of a calf thymus protein active on lipid metabolism
Ellen C. Heesbeen, Gert Rijksen, Lambert M. G. van Golde and **Gerard E. J. Staal**	1015	Phosphorylation of 6-phosphofructokinase in rat lung
Gabriella Ryan and **Ibrahim Z. Ades**	1025	Coordinate elevations of liver δ-aminolevulinate synthase and cytochrome *P*-450 RNA by phenobarbital in chicken embryos: the effects of heme
Dennis Beale and **John Coadwell**	1033	Some observations on the replacement of the conserved amino acid residues of immunoglobulin domains
Rolf A. Løvstad	1039	Interaction of citrate with Fe(III)–bleomycin
Yasuko Shibata, Yoshimitsu Abiko, Takashi Ohishi, Hideki Tamaya and **Hisashi Takiguchi**	1043	Free arachidonic acid source for PGE_2 and TXB_2 production in guinea pig peritoneal macrophages exposed to insoluble glucan from *Streptococcus mutans*
Yoshimitsu Abiko, Hidefumi Aoki, Junko Sato, Makoto Koitabashi and **Hisashi Takiguchi**	1047	DNA homology of surface protein antigen A gene in mutans streptococci
Grzegorz Terlecki	1053	Purification and properties of pyruvate kinase type M_1 from bovine brain
Blaise F. Frost, Kwang Sook Park, Martin Tuck, Suhas Disa, Sangduk Kim and **Woon Ki Paik**	1061	Site-specificity of histone H1 methylation by two H1-specific protein–lysine *N*-methyltransferases from *Euglena gracilis*
A. Zorzano, M. Soley and **E. Herrera**	1071	Rapid effects of insulin and glucose on the hepatic incorporation of gluconeogenic substrates into glyceride glycerol and glycogen

Book Reviews 1077

Edmundo Chávez, José A. Holguín, Cecilia Zazueta and Concepción Bravo 1241 Induction of mitochondrial Ca^{2+} uptake by mersalyl

Shigeno Saito, Yoshimitsu Abiko, Teruyoshi Koyanagi, Yorimitsu Yazawa and Hisashi Takiguchi 1245 Genetic characterization of the *spaA*1 determinant of the surface protein antigen gene from *Streptococcus sobrinus* 6715

Akio Takenaka, Yuichi Ohishi, Tadashi Noguchi and Hiroshi Naito 1255 Effect of some essential amino acid deficiency in the medium on the action of insulin on primary cultured hepatocytes of rats. Hepatocytes do not respond to insulin in some essential amino acid-deficient medium

Susan Bardocz and John E. Hesketh 1265 Effect of RNA synthesis inhibitors on insulin-induced protein synthesis by 3T3 cells

I. V. Zlatanov, M. Foley, J. Birmingham and P. B. Garland 1269 Effect of some polypeptide hormones on the lateral mobility in plasma membranes of rat testes, L-cells and liver, influence of development and ageing

Charles A. Mayfield and Jack DeRuiter 1275 Studies of the inhibition of aldose reductase: evidence for multiple site inhibitor binding

Kazuhiko Yukioka, Shuzo Otani, Isao Matsui-Yuasa, Hitoshi Goto, Hideki Tahara, Seiji Morisawa, Senji Okuno, Yoshiki Nishizawa and **Hirotoshi Morii** 1287 Effect of 1α,25-dihydroxyvitamin D_3 on polyamine metabolism in human monocyte cell line-U937

Erratum 1295

New Patents Section i

Vol. 21, No. 12

Maria I. Mitovska and **Kirana I. Dancheva** 1297 Interaction of pyridoxal phosphate modified cytochromes *c* with mitoplasts

Albert J. Ketterman, Mark R. Bowles and **Susan M. Pond** 1303 Purification and characterization of two human liver carboxylesterases

Vasily D. Antonenkov, Sergey V. Pirozhkov, Svetlana V. Popova and **Leonid F. Panchenko** 1313 Effect of chronic ethanol, catalase inhibitor 3-amino-1,2,4-triazole and clofibrate treatment on lipid peroxidation in rat myocardium

Lars Ødum, Torben Halkier, Peter Højrup and **Inger Schousboe** 1319 Characterization of urinary proteinase inhibitors with segments of amino acids sequences identical to sequences of pancreatic secretory trypsin inhibitor

Rene A. Turcotte and **Angelo N. Belcastro** 1329 Time dependent response of cardiac myofibrillar ATPase activity to exercise

S. P. J. Brooks and **K. B. Storey** 1337 A novel inhibitor of glycogen phosphorylase from crayfish hepatopancreas

Andrzej Ciereszko and **Jerzy Strzeżek** 1343 Isolation and characteristics of aspartate aminotransferase from boar spermatozoa

T. B. Ng, Z. Feng, W. W. Li, S. H. Chan and **H. W. Yeung** 1353 Investigation of ribosome inactivating protein-like activity in tissues of Cucurbitaceae plants

Valeria Vasta, Paola Bruni, Fabio Vannini and **Marta Farnararo** 1359 Fructose 2,6-bisphosphate and insulin stimulation of glycolysis in 3T3-L1 adipocytes

Gernot Osthoff 1365 Far-u.v. CD-spectroscopy and immunological properties of synthetic sequential peptides derived from cardiotoxin $V^{II}1$ of *Naja nivea* venom: an amphipathic α-helix formed by sequence 15–25 of a β-protein

C. Marino, M. Curto, R. Bruno and **M. T. Rinaudo** 1369 Trehalose synthase and trehalase behaviour in yeast cells in anhydrobiosis and hydrobiosis

Theodore Page 1377 Purine nucleotide production in normal and $HPRT^-$ cells

Maria Gaczyńska and **Grzegorz Bartosz** 1383 Proteolytic activity of human erythrocyte membrane during ghosts preparation

Guadalupe Baños and **Pedro A. Reyes** 1387 A comparative study of the effect of ten non-steroidal anti-inflammatory drugs (NSAIDs) upon some mitochondrial and platelet functions

Masanao Katagiri, Toshihiro Sugiyama, Naomi Tsutsukawa, Hiroshi Ishiguro, Nozomi Miyoshi, Fumihide Ishibashi and **Naoyuki Taniguchi** 1395 Comparative studies on microsomal NADPH–cytochrome *P*-450 reductase using a monoclonal antibody: tissue distribution, specific activity and peptide mapping

Blaise Frost, Kwang Sook Park, Sangduk Kim and **Woon Ki Paik** 1407 Effect of enzymatic methylation of apocytochrome *c* on holocytochrome *c* formation and proteolysis

Stephen Rattigan, Aidan G. M. Davison, Perry J. F. Cleland and **Michael G. Clark** 1415 Effect of phorbol esters on the distribution and total activity of protein kinase C in the perfused rat heart

Nget Hong Tan, Chon Seng Tan and **Hun Teck Khor** 1421 Isolation and characterization of the major phospholipase A_2 from the venom of *Trimeresurus purpureomaculatus* (shore pit viper)
